Summary

A highly skilled Frontend Developer with a flair for crafting elegant and responsive web interfaces. Proficient in HTML, CSS, JavaScript, and React, with a keen eye for detail and a commitment to best practices. Adept at leveraging Tailwind CSS to design visually striking and user-centric applications. Continuously evolving with the latest industry trends, I am dedicated to delivering top-notch digital experiences that resonate with users.

Education

- **Guru Gobind Singh College, Maharashtra, India**
  Mechanical Engineering   *Aug. 2018 – May 2021*

Projects

- **Book Rental App** *GitHub Repository*

  - Developed a comprehensive book rental application as a frontend-only project, leveraging Tailwind CSS for a sleek and responsive design.

  - The application enables users to browse an extensive catalog of books, view detailed book information, and manage their rental preferences with ease.

  - **User Interface**: Designed an intuitive and visually appealing interface using Tailwind CSS, ensuring a responsive and user-friendly experience across devices.

  - **Book Management**: Implemented features for users to search for books, view detailed descriptions, and manage their rental status.

  - **State Management**: Utilized JavaScript for dynamic content updates and user interactions, enhancing the overall user experience.

  - **Design Focus**: Prioritized clean, modern aesthetics and seamless navigation to ensure users can efficiently browse and manage their book rentals.

- **Technologies Used**: HTML, CSS, JavaScript,React.js, Tailwind CSS
